

TOP 7

Reasons to Move to IBM WebSphere V9

Are you considering moving to IBM WebSphere V9?

IBM WebSphere V9 provides improvements and features over previous versions including new levels of creativity, flexibility, control, and cost savings.

Don't believe it? Here are the top reasons to upgrade today:

1

Create new apps instantly

Speed and scalability are the name of the game. WebSphere Liberty provides the power to create new apps instantly with a lightweight, composable runtime. Both WebSphere Liberty and WebSphere traditional are now fully Java EE7 certified, giving you the choice of deploying applications across any hybrid environment.

2

Move apps anywhere, and in any way

Create borderless environments with easy application portability regardless of your architectural environment. Move apps smoothly across any cloud container service, including IBM Cloud Containers on Bluemix, Docker (including WebSphere support for Docker Datacenter), or VMware.

3

Improve business outcomes

Complexity kills projects. IBM WebSphere V9 reduces complexity to help managers accelerate development project ROI, and extend the value of on-premises applications with hybrid capabilities.

4

Connect to cloud

Not all cloud services are created equal. New WebSphere Connect capabilities enable you to easily connect on-premises Java apps to cloud with services like Watson, Cloudant, IBM dashDB, API Connect and Log Analytics (beta). WebSphere Connect also includes IBM API Connect Essentials, free of charge, for end-to-end API lifecycle management to create, expose, publish and manage APIs.

5

Manage seamlessly

IBM WebSphere V9 keeps it simple. Manage Java, Node.js apps and APIs through a single administration center. No more switching from one management console to another and losing valuable time.

6

Lower costs

Why pay more when you can pay less? Flexible, "pay-as-you-go" pricing models help you **save up to 30 percent or more**. Pay by the hour or by the month ... whatever you need, it's waiting for you. And for ultimate flexibility and savings, WebSphere Application Server Family Edition lets you choose the application server edition for your specific business need without additional charges.

7

Migrate faster

Time is critical. Get to IBM WebSphere V9 faster and avoid costly infrastructure expenses with WebSphere for Bluemix, providing you immediate access to migration test infrastructure. Now it's easier than ever to migrate to IBM WebSphere V9. As an existing or new WebSphere customer you can select from a series of migration tools and guides, education workshops, and in-person Level 2 Migration support.
